Google Chrome Mozilla Firefox Apple Safari Microsoft Edge In this article, I will introduce how to register for Autodesk Tinkercad. Also, I will explain what the basic operations are, how to use the software, and how to export a 3D model. At the end, I will upload the model to STYLY where we can check how it looks. What is Tinkercad Tinkercad is a free 3D CAD editor software made by Autodesk. You can access the Tinkercad official website from here. I will explain what you can find on the Tinkercad website. Gallery On the Gallery page, you can find uploaded 3D models created by Tinkercad users from all over the world. You can download the data to use for 3D printing and leave comments for a model. Tinkercad gallery 01 In order to download a model for a 3D printer, click on a model like those shown in the above image, and then the dialog below will appear. Tinkercad gallery 02 Blog On the Blog page, there are many posts regarding Tinkercad news, latest information, and operational guides. There are also guides on what kind of materials you should use when 3D printing models (such as the type of plastic or resin). Tinkercad Blog Learn On the Learn page, there are articles about basic operations using Tinkercad. Also, there are modelling tutorials. These are free to read, so you can immediately start learning about Tinkercad. Tinkercad Learn How to Create a Tinkercad Account Next, let's create a Tinkercad account.Click the Sign up button in the upper right or click the Start Tinkering button below in the middle of the page to create an account. Creating a Tinkercad account You will be asked if you have an Autodesk account. If you already have one, you can sign in with your Autodesk account. If you don't have an account, you can create a new one by clicking on the Create Account button. Create a handle for the mug 01 then rotate the 90ship handle. Take it rotate it by sliding the icon à è à € Aøa è À à † àhorte "àhorte à è à € à. If you press the Alt key during the rotation, the rotation moves to a fixed interval of 15 for each time. Now now The model is starting to look more like a cup'. Create a handle for MUG 02 Forward, we create the empty part of the cup. Select the gray cylinder. It creates to be a little smaller' than the cup. The settings for the empty part are in the image below. Values are for reference only, so you can change the value to whatever you want. Mug Hole 01 Next, moves the model point of view to display it from the top. Place the hole object on the cup. Be sure to set the hole object higher' than the mug object. If they are the same height, there will be no no holes created. After you have positioned the objects correctly, select both objects and group them (Ctrl+G). This combines the two objects and makes them become one. Mug Hole 02 Next, we'll regroup the objects again. Select the cup and Hole object and group them together (Ctrl+G). Group we ended up with cup modeling. If you group them in any other nature, the handle (pipe object) will penetrate in the object. So when you create an object like a cup, make sure you keep the correct order when you group things together. After we finish the modeling, we can change the color. Click the Shape tab. À l À l 100 SOLID Aoo!You can select from a number of preset colors, or Ao can use a color code. Change solid color The staining À is complete. Export 3D Finally, we export the model. Select the red borders at the top right and click export. Model Export 01 VerrÀ a window appears. For this tutorial, select OBJ Format. By Flicking HERE, will downloaded a zipped 3D data file of your choice. Template Export 02 The following data will be exported. The export step is complete. The exported data accordingly, the model created will be automatically saved and added to the account page. À you can change the model name account page or from the work plan page. Added model that matters your model in Styly way now that your 3D model is ready, we check how it appears in Styly.log in Styly and creates a scene. To learn to learn account, please refer to this article. STYLY top page You can import the model by following the steps in order. Click on èÀÀ "À¼ÀÀÀÀiÀ. STYLY 3D Model Import After you finish uploading your model, go to My Models and click on the added model. My models I think that the model looks great. The polygons are not shattered and the shape is exactly same. One problem is that there is no material applied. In STYLY, the mug doesn't look blue. Please check that the downloaded data had the mtl file with it. Model looks How did you like this article? There are a number of free 3D editors, like Tinkercad, available globally.Tinkercad is a well-rounded software. It can be used for multiple modelling projects. It is suitable for all basic modelling.It may also be helpful to design a concept in your head or try to 3D print a simple model. To use TinkerCAD, navigate to the TinkerCAD website. TinkerCAD is an autodesk product, and requires an account to use. If you have an Autodesk account already, you can click the eÀÀÀSign IneÀÀÀ button in the top right to get started. If you do not have an account, click the eÀÀÀJoin NoweÀÀÀ button in the top right to create a personal account. Creating an account is free and only requires a valid email address. Note: when making a new account, make a new personal account and not an educational account. After logging in, it will show a dashboard with previews of your TinkerCAD projects. If you just created an account, there will be no pictures. To get started, click the eÀÀÀCreate new designeÀÀÀ button near the top of your dashboard. This will bring up a window with a workplane, some shapes on the right, and some other options spread around. Right now, we are only going to focus on importing an object. To import an object, click the eÀÀÀImporteÀÀÀ button in the top right of the page. This will bring up a window to drag and drop a file, or to import from a URL. Since you downloaded an STL from thingiverse earlier, you can just open your downloads folder and A Etaarz of from from your file in the window. Most 3D objects are in the .STL file type. Once you do, click the Àe àYImport à in the bottom right of the window to import it. Note: There is a maximum file size of 25 MB. If your À9À' file is larger than this one, consider choosing a different model to import. Next, the item is loaded and you should see it on your workplane. À You can rotate the camera by holding down the right mouse button and dragging the mouse. Zoom in by moving the scroll wheel. More details on how to navigate the workplane are available in the working plane navigation tutorial. Export as STL from TinkerCad when you have finished designing or editing to TinkerCad and you are ready to start printing, À is possible to export your item as STL from TinkerCad. To make thereÀ', click the "Export" button on the top right of the screen. This will open a new window with details on how to export. In the "for 3d printing" section, click the .STL box to export it as an STL file. This download your TinkerCad object as an STL file. This À' is the easiest way to export your item as STL to print later. Next Tutorial: Navigating The Workplane previous tutorial: Download from Thingiverse Thingiverse
